

Documented Fire Risk Assessment

Compliance with the Regulatory Reform (Fire Safety) Order 2005

Fire Risk Assessment - Format British Standard - PAS 79:2012

Fully qualified Fire Risk Assessors

Included in the fire risk assessment would be:

An on site visit by a fully qualified fire risk assessor to conduct a full non-destructive site survey of the building or area of your responsibility to identify / assess:

- Who is at risk,
- Process and / or building hazards,
- Potential ignition sources,
- Any deficiencies in existing fire precautions / procedures,
- Correct type(s) / quantities and suitably maintained fire safety equipment,
- Appropriate fire training and drills,
- Appropriate signs / notices,
- Suitable means for detecting fire and raising the alarm if fire were to occur, and
- Adequate means of escape in the event of fire.

Our assessor would also evaluate your fire records, emergency evacuation procedures and, where necessary, any permit to work systems that there may be in place.

Following the site survey (fire risk assessment) of the Building(s) or area of responsibility, a fire safety management plan (PDF) would be produced and issued to the responsible person(s).

Included within this document would be:

- Documented fire risk assessment (Format British Standard - PAS 79:2012 Fire Risk Assessment),
- List of significant findings with risk rating,
- Recommendations on all remedial action(s), where required,
- Identification of potential ignition sources,
- Fire risk assessment performance indicator,
- Fire action plan for corrective action (Risk reduction / Legislative compliance).

Our documented fire risk assessment would not only reduce the risk of fire occurring and ensure compliance with current fire legislation, but will also ensure that you have appropriate precautions and safeguards in place to protect staff and visitors to the premises.

Our Assessors are fully qualified and technically competent to conduct fire risk assessments. They're trained to carry out fire risk assessments and provide guidance in accordance with either British Standards or Building Regulations.
